

The Fourth Grade's goal is to raise \$500 to purchase a total of four Hippo Rollers to be sent to villages in South Africa. Each Hippo Roller costs \$125, and ships for free within South Africa. If we raise more than \$500 and we don't have enough to buy another Hippo Roller, we'll buy the Utility Cap. This attachment allows farmers to water their crops more efficiently, and it enables users to draw water without opening a larger seal.
